MONISH P

.NET Developer (C# | ASP.NET | ASP.NET MVC/Web API | SQL Server | Angular/React)

Erode, Tamil Nadu, India | +91 9345789114 | monishvp2002@gmail.com | linkedin | github.com/monishvp | portfolio

PROFESSIONAL SUMMARY

.NET Developer with 2+ years of experience designing and building enterprise web applications using C#, ASP.NET, ASP.NET MVC/Web API, Entity Framework, LINQ, and SQL Server. Skilled in building scalable RESTful APIs, optimizing SQL Server data access, and delivering enterprise-grade backend solutions across the full Software Development Life Cycle — requirement analysis, API design, database optimization, testing, deployment, and production support. Complements strong .NET expertise with frontend experience in Angular JS and React, bringing a practical, .NET-first approach to full-stack development.

TECHNICAL SKILLS

.NET Technologies: ASP.NET, ASP.NET MVC, ASP.NET Web API, Entity Framework, LINQ, RESTful API Design, Microservices Concepts

Languages: C#, JavaScript, TypeScript, Python, SQL

Frontend: AngularJS, React.js, HTML5, CSS3, JavaScript, TypeScript

Databases: Microsoft SQL Server, PostgreSQL, Database Design & Query Optimization

Cloud & Tools: Azure Fundamentals, Git, GitHub, Visual Studio 2022, VS Code, Postman, Power BI

Practices: Full Stack Development, Agile/Scrum, REST API Development, AI-Assisted Development (Cursor, Claude), Workflow Automation (n8n)

PROFESSIONAL EXPERIENCE

Software Developer — May 2024 – Present

Brightspot Technology Solutions | Coimbatore, India

- Developed and maintained multiple full-stack web application modules using ASP.NET, C#, React, and AngularJS, delivering features across the front end, back end, and database layers.
- Designed and implemented RESTful/Web APIs and backend services powering enterprise applications used by multiple business units.
- Built and optimized data access layers on SQL Server using Entity Framework and LINQ, improving query response times and reducing development effort.
- Built AI-powered features and workflow automation tools that reduced manual processing effort for end users.
- Collaborated cross-functionally with product, QA, and development teams across the SDLC, from requirement analysis through production support.
- Improved SQL Server database performance and application reliability, contributing to reduced production incident volume.
- Participated in requirement analysis, sprint planning, testing, deployment, and post-release support across multiple release cycles.
- Wrote unit and integration tests to catch regressions early, improving code stability across releases.

KEY STRENGTHS

- Strong grasp of OOP principles, design patterns, and writing maintainable, scalable code in C#.
- Comfortable owning a feature end-to-end — from database schema to API to frontend UI.
- Quick learner with a track record of picking up new tools and frameworks independently (AI agent development, workflow automation).
- Clear communicator who works well with cross-functional teams (product, QA, design) in Agile environments.

PROJECTS

Referral Reward Platform

ASP.NET, C#, AngularJS, SQL Server, Power BI, REST APIs

- Built referral tracking and reward management features end-to-end using ASP.NET, C#, and SQL Server, supporting the full referral lifecycle.
- Automated reward approval and payout workflows, significantly cutting manual processing time and turnaround.
- Developed AngularJS UI modules for referral submission, status tracking, and reward history.
- Optimized SQL Server queries and indexes, improving reporting performance and system reliability.
- Built Power BI dashboards tracking campaign KPIs including conversion rate, reward trends, and channel performance.

Corksy – Winery eCommerce & Reservation Platform

React.js, Node.js, GraphQL (Apollo), PostgreSQL, Redux Toolkit, REST APIs, Bootstrap

- Developed end-to-end reservation and booking workflows (reservations_v2) using React.js and GraphQL, supporting real-time slot scheduling, table allocation, and guest management.
- Built and optimized PostgreSQL reporting queries and automated notification scripts, delivering accurate daily reservation, sales, and operational analytics.
- Created responsive, embeddable eCommerce widgets enabling third-party merchant sites to seamlessly integrate online purchasing, event ticket booking, and cart checkout.
- Enhanced Admin Web portal features using React and Redux Toolkit to streamline merchant catalog setup, order management, and reservation configurations.
- Delivered UI improvements and operational bug fixes across Point-of-Sale (POS) and eCommerce modules, improving checkout speed and staff usability during peak hours.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering **2020 – 2024**

Karpagam College of Engineering, Coimbatore | CGPA: 8.23

ACHIEVEMENTS & RECOGNITION

- Recognized within the team for proactively building internal AI tooling that reduced repetitive manual work for developers.
- Took ownership of the Referral Reward Platform's reporting layer, improving dashboard load times and data accuracy for stakeholders.
- Maintained a CGPA of 8.23 in Electronics and Communication Engineering, reflecting strong analytical and problem-solving fundamentals.
